DJ SKILLS FOR TEACHERS

guidance and support on equipment,
software and ideas for teaching.

OVERVIEW

Dj'ing can be a great way to engage students in musical learning using technology that is synonymous with many of the styles of music that young people are listening to today. Our DJ Skills course is designed for music teachers who are interested in developing their schemes of work to include DJ'ing at Key stages three and four, but who have limited experience in this area and want to develop their confidence and knowledge to support their students and plan effective schemes of learning using this technology.

With the inclusion of DJ'ing in the AQA, OCR and Eduqas exam syllabus and vocational courses, this course is designed to unpick the skills needed to succeed at GCSE and will provide video examples of moderated student performances alongside the grades they achieved.

The approach has been developed by a professional DJ and secondary school teacher, and has been carefully planned to ensure that the course allows plenty of time for practical learning so that teachers can become confident in mixing tracks, triggering samples and using a USB DJ controller alongside Serato DJ software.

<http://bit.ly/DJSkills>

AIMS OF THE COURSE

- Explore ways to engage all students in practical, authentic music making through the use of DJ controllers
- Develop confidence in using DJ controllers and software to mix, sample and perform through DJ'ing
- Understand how the approach works with students – all Musical Futures courses are delivered by teachers in classroom settings who use these approaches with their students

SESSION DESCRIPTIONS

DISCOVER DJ'ING:

A hands-on exploration of all the necessary equipment & software, what it does and how to use it!

GET CREATIVE:

Experimenting with mash-ups, loops and mixes

WHOLE-CLASS DJ'ING:

Practical ways to deliver DJ'ing with KS3 classes

PERFORMING AT KS4:

A look at the skills required to achieve an excellent performance at GCSE level

ADDITIONAL INFORMATION
